**1a**

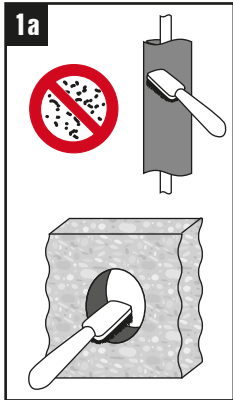

Diagram showing the removal of dust from the hole using a brush. A red prohibition sign is shown over a hole with dust.

**1b**

Diagram showing the removal of dust from the hole using a brush. A red prohibition sign is shown over a hole with dust.

**2**

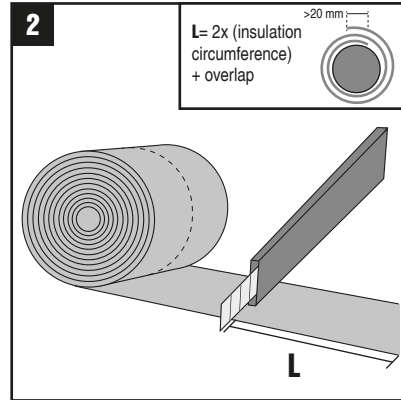

Diagram showing the application of insulation tape. The length  $L$  is defined as  $L = 2x$  (insulation circumference) + overlap. A detail shows a hole with a diameter  $>20$  mm.

**3**

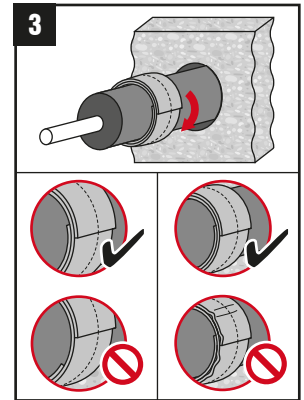

Diagram showing the correct and incorrect application of the insulation tape. The correct application is shown with a checkmark, and the incorrect application is shown with a red prohibition sign.

**4**

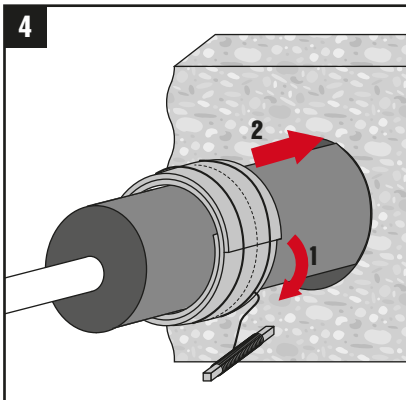

Diagram showing the correct application of the insulation tape. Red arrows indicate the direction of application (1 and 2).

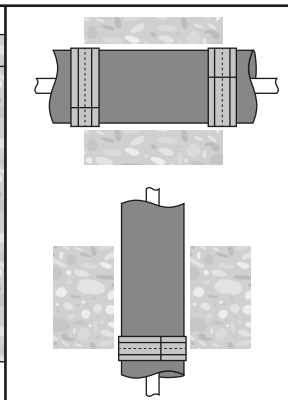

Diagram showing the correct application of the insulation tape.

**5**

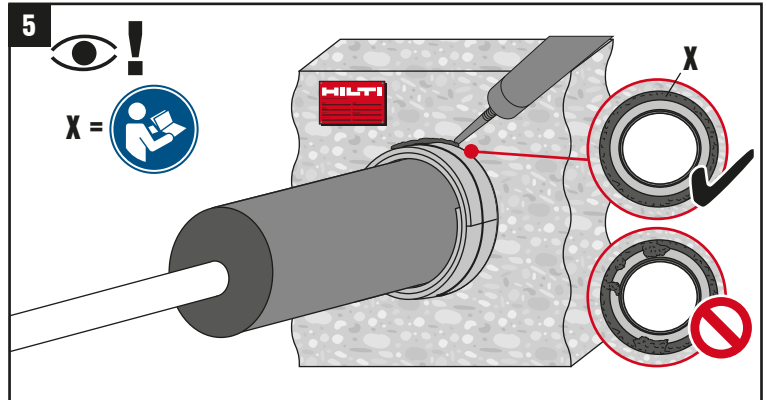

Diagram showing the final inspection of the insulation tape application. A red 'X' indicates a defect. A blue icon shows a person reading a manual. A red prohibition sign is shown over a hole with a defect.
